

Preserving our Space History and Promoting our Space Future!

Save the Dates

"Touch Our History in Space" Exhibit – October 21th-24nd,
10am to 7pm at The Unity Center (on the former Hamilton AFB) in
Novato, CA:

"The best way to learn about history is to touch and hold it!"

Marin County's first space exploration exhibit will feature unique artifacts from the Winans Collection and The Chabot Space & Science Center. The emphasis will be on the history of space exploration, and how accomplishments in mathematics, science and engineering allowed the U.S. to achieve its goal of "landing a man on the moon and returning him safely to earth."

This is one of the few exhibits that gives the public **an opportunity to hold space-flown artifacts** from the U.S., Russian & Soviet space programs. In addition, **special guest appearances by astronauts** have been tentatively scheduled.

There will also be daily showings of the movies "Apollo 13", "The Right Stuff" and HBO's mini-series "From the Earth to the Moon" on Unity Center's 10'x12' rear projection screen with Dolby sound.

As a volunteer staffed & privately funded non-profit corporation, *The W Foundation* has formally aligned itself with the Chabot Space & Science Center (California's Smithsonian Institution affiliate) to educate children about the exciting history of space exploration, and to increase the public's understanding that a strong global commitment toward future manned space expeditions is an important key to accelerating our civilization's development.

Volunteers are needed!
